Feline Idiopathic Cystitis

Dr. Jason Strasberg

A groundbreaking treatment for feline idiopathic cystitis is now available at VCSG, offering a promising new option for cat owners. This innovative approach utilizes a single, low-dose radiation session to target and alleviate the inflammation and painful symptoms associated with this chronic condition. Early results suggest significant relief for affected cats, marking a major advancement in veterinary care for feline urinary health. *For more information, call VCSG (423-591-0270) and ask for the Radiation Oncology Department or email jason.strasberg@vcsgvets.com*

Welcome Back Dr. Marlowe!

DVM, DACVIM (ONCOLOGY)

After welcoming the birth of her second child, VCSG is happy to welcome Dr. Marlowe back to VCSG in providing care for her medical oncology patients. *For more information, contact info@vcsgvets.com.*

Welcome Dr. Kelly Crawford!

DVM, DACVIM (NEUROLOGY)

Dr. Crawford is originally from the suburbs of Atlanta, Georgia. She went to the University of Georgia for her undergraduate and veterinary degrees. After her rotating internship in Denver, Colorado, Dr. Crawford completed her specialty internship and residency training in New Mexico, Indiana (at Purdue University), *Continued on page 2.*

and Michigan. Dr. Crawford has worked in private practice in Michigan and Colorado since finishing her residency in 2019. She has been published for her research on atlantoaxial instability and polyneuropathy in Siberian cats. She enjoys all aspects of Veterinary Neurology – especially neurosurgery and managing complicated seizure patients. For more information, contact kelly.crawford@vcsgvets.com.

Welcome Dr. Shelby Verheuvell!

Dr. Verheuvell grew up in the northern Atlanta area through middle and high school. She moved to Savannah, Georgia, where she completed her undergraduate degree in biology before starting veterinary school at the University of Georgia. While in Athens, she met her then-classmate, now husband, Matthew. After graduating from veterinary school, she completed a rotating internship at Virginia-Maryland Regional College of Veterinary Medicine before matching at Auburn University for a residency in small animal internal medicine. For more information, contact info@vcsgvets.com.

Diagnostic Ultrasonography

CHASSIDY ERALIE, RDMS (ABD, OB, PS), RVT, RT (R)

Performing a diagnostic ultrasound at a veterinary hospital involves using high-frequency sound waves to visualize the internal structures of animals, aiding in the diagnosis of various conditions. As veterinary ultrasound technologists, we work closely with veterinarians and radiologists to identify abnormalities in organs and tissues, helping to guide treatment plans and follow-up on progressive diseases. This non-invasive procedure is crucial for evaluating soft tissue structures and detecting tumors and foreign bodies. Our expert veterinary team and sonographer utilize the latest technology to deliver precise and comprehensive imaging for a variety of veterinary conditions.
